Amano Partners with Energy Star

Roseland, NJ – May 2009 - In a continued effort to deliver the best product to market and to pay close attention to environmental protection, Amano has recently partnered with **ENERGY STAR** as a Manufacturer of end-use products with qualified External Power Supply (EPS).

Equipment and components that have the **ENERGY STAR** help conserve energy through special energy-efficient designs, enabling them to perform regular tasks while using less energy. Most office equipment is left on for 24 hours a day, making energy-efficient design and power management features important for saving energy and reducing greenhouse gas emissions that contribute to global warming.

The goal of **ENERGY STAR** external power supply specifications and requirements is to recognize those models with an efficient ac-ac or ac-dc conversion process and ensure that the ENERGY STAR is represented only on the market's most energy-efficient products.

At Amano, we have carefully examined our product designs and have made adjustments where necessary, in order to comply with **ENERGY STAR** requirements. As a result, a large number of our time clock models now meet the **ENERGY STAR** Criteria for End-Use Products using External Power Supply.

Amano will continue to pursue improved and rationalized operations, paying close attention to environmental protection and making the best use of resources available, with "reducing", "re-using" and "recycling" activities.

About Amano USA Holdings, Inc.:

Amano USA is the subsidiary of Amano Corp. Japan, a yokohama-based organization whose specialties include time information systems and time recording products, and parking systems. Amano USA operations also includes security/access systems as well as floor care and cleaning products.

Amano USA operates more than 25 branch offices, in addition to world class manufacturing in Loveland, OH and Sparta NC, which enable it to serve clients in the United States, Canada, Mexico and Latin and South America.
